Commanding Brigade Yorktown Va
General:

Accompanying this communication is an application for leave of absence by my Chaplain Rev R. C. Howard Wallace.

Permit me to request you respectfully but earnestly to grant it. The reasons actuating this request are substantial and earnest.

My Chaplain left his congregation in charge of his father, who has been laid aside entirely by disease, by which he is closely confined:—rendering a return to make other arrangements necessary. Peculiar circumstances both in his congregation and family, require that this visit should be made quickly.

Having been punctually at his post in the regiment for the past six months, and faithful in the discharge of all the duties of his office:—and further, having provided a substitute to occupy his position during his proposed absence, I feel it a duty I bear to him, to urge the above request.

Very respectfully

Appellant was granted a pension at \$10 per month from November 1, 1863, for chronic diarrhoea and results.

A reissue was made at \$15 from April 6, 1882, and \$20 from February 22, 1888, to include chronic diarrhoea, general debility and malarial poisoning.

December 2, 1889, appellant filed an application for increase and rerating alleging that he was entitled to a greater

-2-

amount of pension, and that the rating for malarial poisoning should cover the period from the date of his discharge to April 6, 1882.

That part of his claim which related to increase was rejected on the ground that he had been adequately pensioned therefor, and so much thereof as related to rerating on malarial poisoning was rejected on the ground that he could not be rated thereon as an independent disability, prior to April 6, 1882, the date on which he filed his declaration therein.

From this action the appeal is taken.

Claimant's original declaration was filed December 29, 1879, in which he alleged "that in the line of duty at various places in Virginia he contracted general debility, ill health including diarrhoea."

In an affidavit filed April 6, 1882, he alleged that from February 18, to July 4, 1863, he suffered much of his time from Peninsular diarrhoea, and malaria resulting in anaemia and liver difficulty and general physical prostration.

It is evident that the claimant alleged malaria as an original disability and not as a resultant disability, and not having alleged it until April 6, 1882, and not prior to July 1st, 1880, he could not reasonably expect it to carry arrears.

-3-

It does not appear that at any time a grade rate has been recommended by any Board, in the absence of which it is evident that a \$20 rate is as high a rate as could properly be accorded for "total of rank," for the rank that claimant held, which was that of chaplain.

The action of rejection is affirmed.

Very respectfully,

Assistant Secretary.

XXXXXXXXXXXXXXXXXXXXXXXXXXXX

Sir:-

In the matter of the appeal in the above cited claim, I have the honor, in response to the departmental call of March 25, 1891, to submit the following statement:

Appellant was granted a pension at \$10 per month from November 1, 1863, for chronic diarrhoea and results.

A re-issue was made at \$15 from April 6, 1882, and \$20 from February 22, 1888, to include chronic diarrhoea, general debility, and malarial poisoning.

December 2, 1889, appellant filed an application for increase and re-rating, alleging that he was entitled to a higher amount of pension, and that the rating for malarial poisoning ^{should} cover the period from the date of his discharge.

-2-

The claim involving title to increase for the aforesaid causes except malarial trouble, was rejected on the ground that he had been adequately pensioned therefor, and that part of the claim relating to re-rating for malarial poisoning was rejected on the ground that there was no provision of law under which he could be pensioned for malarial poisoning, as an independent disability, prior to April 6, 1892, the date when he first filed his declaration alleging the same, from which action this appeal is taken.

In the certificates of medical examinations had in the case the following ratings have been recommended:

January	10, 1882,	1/2	for chronic diarrhoea and general debility;
May	3, 1882,		no rating recommended;
September	20, 1882,	1/4	for chronic diarrhoea and malarial poisoning;
February	22, 1888,	12/18	" chronic diarrhoea, and resulting piles and general debility;
		4/18	" malarial poisoning and anaemia;
		4/18	" disease of liver, spleen, and dyspepsia;
September	3, 1890,	15/18	" chronic diarrhoea and disease of rectum,
		8/18	" malarial poisoning and disease of liver, and
		6/18	" general debility.

The Medical Referee in an advisory opinion, dated March 24, 1892, holds that the aforesaid action is proper.

-3-

The appeal and papers in the case are herewith submitted for
your consideration.

Very respectfully,

A handwritten signature in cursive script, appearing to read "G. M. Raum", written in dark ink. The signature is fluid and extends across the right side of the page.

Commissioner.

To the Honorable,

The Secretary of the Interior.

IN THE MATTER OF THE CLAIM OF
R. Howard Wallace,
(CERTIFICATE NO. 224.033)
for a pension.

Dr. J. H. Wallace
Appeal from
Decision of
Commissioner of
Pensions.

First: -

The Honorable Commissioner erred in several particulars.

Second: -

Claimant applied for Pension on the plea of GENERAL DEBILITY which arose from several causes, all of which are set forth in proofs, furnished with original application.

The application was not for "Chronic Diarrhea," as it would have been, had this been the basis of claim, but for general debility, which claim covered all causes.

Third: -

The words, "including diarrhea," in the application, were entirely subordinate, totally unessential, were not designed as the "allegation," of basis of claim, and were unnecessary as used, as the proofs showed the causes of the condition alleged.

Fourth: -

This was the initial error. The "allegation," was a general result. Pension was granted for a PARTIAL CAUSE of the EFFECT ALLEGED. The less was substituted for the greater. A part made to stand for the whole. Thus, other parts were ruled out.

of which no record is made of all the causes, inducing General Debility. To be examined on ALL CAUSES was my right.

Act of Congress, approved July 25th 1882, Sec. 4 reads: - "That all examinations shall be thorough and searching, and the certificate contain a full description of the physical condition of the Claimant, at the time which shall include ALL the physical and rational signs, and a statement of all the structural changes."

September 20, 1882, I demanded examination on all causes for claim alleged, and this was refused. This is a marked error and wrong to me.

Sixth: -

Under erroneous interpretation of original allegation, the Dept asserts that I first alleged "Malarial Poisoning," April 6th 1882. Why then was I refused examination, on this cause (which the Court says was alleged as above) when demanded of Brooklyn Board, nearly six months later? And also when by affidavit at about the same date (September 1882) the facts were laid before the Court, and examination demanded?

This is a gross error and wrong.

Seventh: -

The Honorable Commissioner Black, in a letter to Hon. F. A. Johnson, Glens Falls, says I have received all that is warranted by disability, "SHOWN TO EXIST."

If not shown, why not? Because of,

First, Error in interpreting the alleged basis of claim, and

Eighth: -

The application, made September 1882, to amend the original, was not due to any change of views, or intent, but with the purpose of meeting the interpretation insisted on by the Dept, whereby cause was substituted for effect. (Sec. 12)

Ninth: -

In defiance of law, other facts (excluded) and an admitted allegation prior thereto. Certificate was issued Jan. 1883, ignoring the original, and (as asserted) subsequent allegation, which was a gross error.

Tenth: -

Certificate was issued for \$10.00 per month, only which was an error as the testimony clearly showed Total Disability. Your date of discharge from service, and a "thorough and searching examination of all physical signs," as demanded by law, but unjustly and erroneously denied, would have fully sustained the original allegation in "General Debility," from all causes. This is confirmed by the fact that when claimant finally secured a "thorough" examination, his pension was increased to \$20.00 per month, as entitled for Total Disability," shown to exist in 1863.

Eleventh: -

Error was made in Re-issue in allowing \$15.00 per month, from April 6th 1882 (on the basis of the Honorable Commissioner's assertion that Malarial Poisoning was then first alleged) because

The original affidavit, medical and lay, supported as they were by Examination by Board (evidently) showed Total Disability, if

Thirteenth: -

If the propriety of the interpretation of the allegation, made by Claimant, by the Dept were admitted, the proofs and records show error and gross injustice in allowing only \$10.00 on first issue, as the resulting General Debility admitted in Certificate was total, from discharge onward, entirely independent of the effect produced by Malarial Poisoning.

REPORT
No. 3545.

R. HOWARD WALLACE.

JANUARY 31, 1905.—Ordered to be printed.

Mr. BALL, from the Committee on Pensions, submitted the following

REPORT.

[To accompany H. R. 15768.]

The Committee on Pensions, to whom was referred the bill (H. R. 15768) granting an increase of pension to R. Howard Wallace, have examined the same and report:

The report of the Committee on Invalid Pensions of the House of Representatives, hereto appended, is adopted and the passage of the bill is recommended.

The House report is as follows:

The officer, now 76 years of age, served as chaplain of the One hundred and sixty-eighth New York Volunteers from February 13, 1863, to October 31, 1863, when honorably discharged with the regiment.

The medical records of the War Department show him treated in October, 1863, for diarrhea.

He is now pensioned under the general law at \$20 per month (total of his rank) on account of chronic diarrhea and resulting general debility, and malarial poisoning.

Claims for increase of pension were rejected, the last one in July, 1904, upon the ground that a higher rating was not warranted.

When last examined, in March, 1904, the board of surgeons at Utica, N. Y., rated him \$4 for diarrhea, \$6 for piles, \$10 for a hernia, and \$6 for slight deafness of both ears.

Medical and other testimony filed with your committee shows that the officer is a severe sufferer from chronic enteritis and malarial poisoning incurred in the service; that these long-continued disabilities have produced cerebral anemia and general weakness, so that he now demands frequent aid and assistance under physician's directions; that he possesses no property, and that his only income consists of a small conditional annuity from a church board of relief, he being wholly unfit for literary or professional services.

Your committee is satisfied that the officer's disabilities of service origin are such as to wholly prevent him from the performance of any manual labor.

Under these circumstances he is entitled to the rate of pension provided under the general law for that condition—namely, \$30 per month—and the passage of the bill is therefore recommended.

 Washingtonville N.Y., that he became acquainted
 with the claimant in Feby. 1863, but he knew
 him well by reputation several years previous to that
 time as he resided previous to the breaking out of
 the Rebellion & now resides within a few miles
 of the claimant. When the claimant's regiment
 came to Yorktown Va. the deponent was stationed
 at that point with his Battery. He & his Co. left
 New York and while the Regt. remained there
 which was until the month of July the depo-
 nent was very intimate with the claimant, meet-
 ing socially & on the line of duty very often, almost
 daily. At the time he first saw claimant he

he also did much work in the way of special duty, also when in active duty he was conspicuous for his personal bravery, at one time saving quite a strong force by forethought & bravery.

Defendant further says he knows of the claimant being taken seriously ill at Yorktown & was obliged to go home to recruit his health. About this time there was very much sickness among the troops and a great many died. At one time in the Fall of the year 1863 the defendant had only 20 men for duty out of a full complement of 70 men. & among some organizations the proportion of sick was still larger, the result of remaining so long in that unhealthy climate. Yorktown was once a place of several thousand people but at the beginning of the war it had become depopulated & destroyed.

Defendant says he believes the claimant became poisoned by that malaria & has never recovered from it. That he knew nearly all of the officers of the claimant's Regt. & that now nearly all of them dead; of the Field Staff only the claimant & Co. Master are living. That he did not meet the claimant for a

Deponent also says that after his muster out the claimant was in such poor health that he was obliged to settle down in a limited field of labor, a place not equal to the great attainments of the claimant, that he was obliged to refuse acceptance of offers to assume the charge of pastorates where the salary would have been lucrative & where his abilities & great cultivation would have been properly appreciated. At no time since his muster out has his health been equal to the task of taking care of a large congregation. For a number of years he has been obliged to only partially fill the pulpit of the church in his charge & has voluntarily submitted to a reduction of his salary, until now it is of but little account. He is obliged to ask the government to grant some pecuniary relief. Deponent knows that physicians & friends have for several years advised a total cessation from mental & physical labor.

Deponent further says he has no interest either directly or indirectly in the prosecution of this
