Fairfield, ME 04937

Dear Collector,

Parker shotgun, serial number 235919, was completed on October 2, 1931. According to Parker Bros. Stock Book No. 82, it was a DHE hammerless, 28-gauge on a 00 frame. It featured Titanic Steel barrels with a length of 28 inches and 2 13/16" chambers. Stock dimensions, weight, and chokes are not listed in the stock book for this gun.

The price listed in the 1931 price list for a DHE grade was \$160.00..

Parker Bros., Remington Arms Company Inc. and others repaired and reconfigured guns as a major part of the gun trade. Over the years, this Parker may have undergone changes to suit its owners, either at the factory or other competent facility. Complete factory return and repair records **do not exist** therefore our research team cannot comment, report, or have any responsibility for work performed. It is important to note that those Parker records remaining are hand written and show considerable fading from their age. The research committee has done its best to interpret and report our findings in answer to this request and assumes no responsibility for the recorded accuracy or other work completed.

Sincerely,

Chuck Bishop
