Dear Mr. Hyatt,

Our request to London for the original build sheet on your Holland & Holland Badminton came up negative. From time to time there are gaps in the records and information regarding a certain firearm can not be located.

The only information available was that the gun was built sometime in 1947 in 12 bore with 28 3/8" barrels also, the gun was purchased by a Mr. Ferrera.

I hope that this information is of help. Thank you for your inquiry.

Dear Mr. Hyatt,

Enclosed, please find the buttstock, action and forend of H&H Riviera No. 34373. We have received the gun back from the factory having had the requested work completed. The opening in the grain at the top of the stock is a characteristic of that piece of wood and was refinished twice only to become visible again. This is of no consequence to the integrity of the stock which we would reassure you is mechanically sound. The screw on the trigger guard and the breech pin have been addressed as you requested. Also, the stock has been darkened. We trust that you will thoroughly enjoy the gun.

Very truly yours,

John Collins
