Dear Mr Hyatt

The fact that the Duclay barrels  
"overflows" is of no import as there  
is no ejector on this gun.

I made another forced rod as the  
one with the gun was a cruddy re-  
paired item; there is no charge.

There are a number of past sins  
on the H&H barrels. I have repaired  
the /buzge/cunt area as well as I can  
without further beaming the balls.

The ribs are on properly & straight  
but there is little I can do about  
bad polishing by previous & definit-  
ly "lesser" artificers (next to front  
right!) without again beaming the  
balls

Sincerely  
A. J.
