CONFEDERATE  
LEECH & RIGDON REVOLVER  
MADE IN  
GREENSBORO, GEORGIA

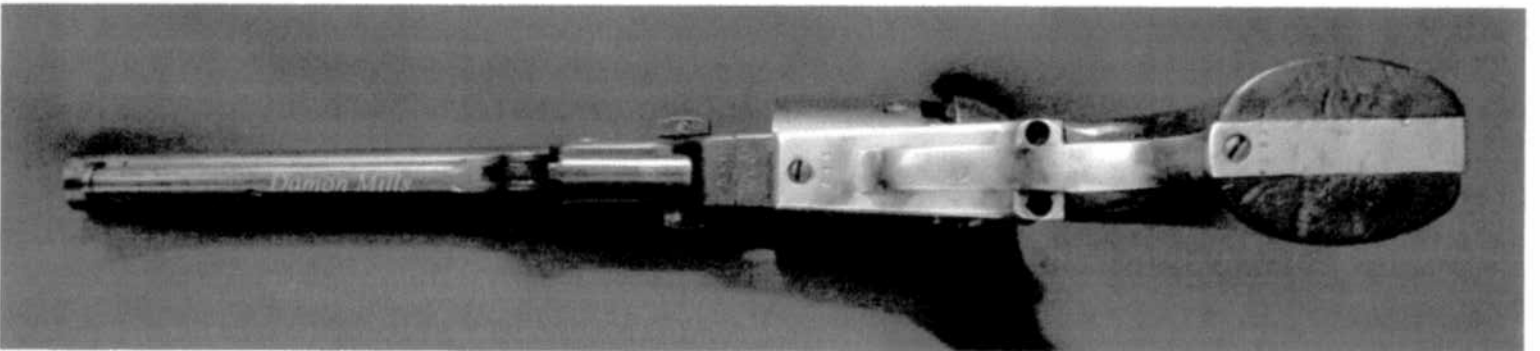

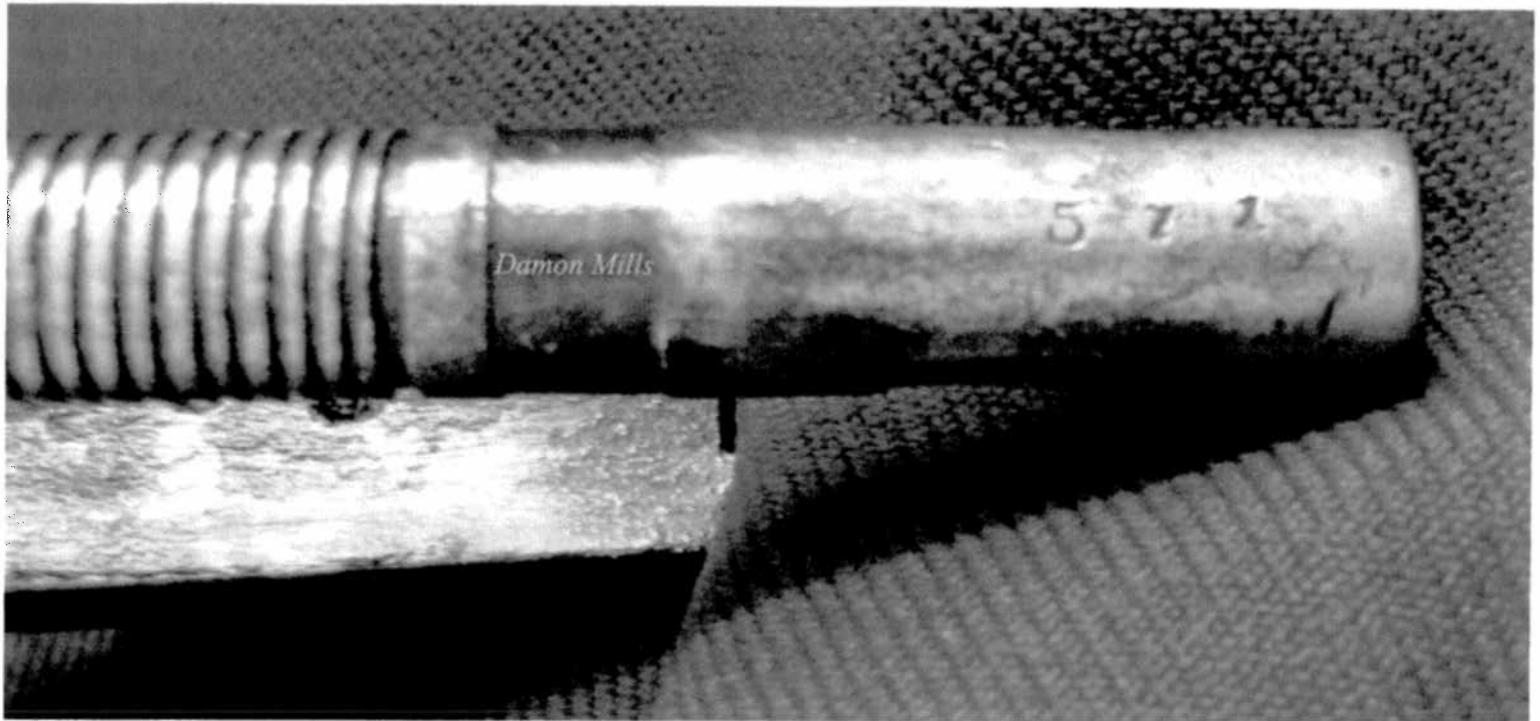

A pleasant, solid, very good plus condition, early Leech & Rigdon Revolver, serial number 571. This gun is one hundred percent original with a light brown patina, tarnished brass and most of the original varnish in the grips. The serial number is found on the frame, backstrap, trigger guard, barrel, cylinder, loading lever, loading lever catch, barrel wedge and cylinder pin. There is a cryptic mark on both sides of the forward trigger guard post. The nipples are intact and the safety pins are still showing on the back of the cylinder. The action is crisp and rifling is still present in the bore. There are a few dents on the butt, which seems to be normal for one of these. The barrel address is light (probably a light stamping to begin with) with a clearly visible CSA and if you look hard you can see the Leech & Rigdon. Price \$24,500.
