To Whom It May Concern:

Stone Mountain Relics, Inc. was established in 1978 to engage in the purchase, sale and appraisal of antique military memorabilia.

After careful examination of your Warner Revolving Rifle, I have concluded that it is probably the finest example known. The engraving on the frame and cylinder are the probably the finest of Warner's Engraving. The stock exhibits a cheek piece which to this appraiser is unknown on any other Warner Revolving Rifle. This gun surfaced in South Africa earlier this year. Why or how this weapon came to be in South Africa is a mystery. This gun was most definitely custom made and exhibits most of the original brown and blue finishes. This Warner Revolving Rifle is truly a prize for the eclectic firearms collector. The current replacement value as of June 1, 2002 is **\$25,000.00**
