The Winchester Model 12 Super Pigeon grades were done strictly through the Custom Shop. While the serial numbers have a Y prefix they should not be confused with a Y series Model 12. The Super Pigeons had the old forged receivers, which were held in inventory by the Custom Shop. They were all engraved and the wood was either A or B carved. The Y was added to conform with the Gun Control Act of 1968. The regular Y series Model 12s were all production guns that used cast receivers.
