

The Parker Gun

PARKER BROTHERS
MAKERS

Meriden, Conn.

December 13, 2016

Parker shotgun, serial number 142135, was ordered by the Pacific Hardware & Steel Co. of San Francisco, CA on March 29, 1907 and shipped on August 24, 1907. According to Parker Bros. Order Book No. 74, it was a DHE hammerless, 12-gauge. It featured Titanic steel barrels with a length of 30 inches. The stock configuration was a pistol grip. The order was placed by duBray.

The price was \$100.00 plus \$25.00 for ejectors.

Parker Bros., Remington Arms Company Inc. and others repaired and reconfigured guns as a major part of the gun trade. Over the years, this Parker may have undergone changes to suit its owners, either at the factory or other competent facility. Complete factory return and repair records **do not exist** therefore our research team cannot comment, report, or have any responsibility for work performed. It is important to note that those Parker records remaining are hand written and show considerable fading from their age. The research committee has done its best to interpret and report our findings in answer to this request and assumes no responsibility for the recorded accuracy or other work completed.

Sincerely,

Chuck Bishop
