

SHOOTING SUGGESTIONS

The following suggestions are designed to aid you in securing greater accuracy and more enjoyment from your Colt Revolver or Automatic Pistol. The rules for good shooting are simple. Follow the suggestions carefully and you will add greatly to your enjoyment of shooting and your ability to produce good scores.

1. Stand in a comfortable position, with free hand on belt, hip or hanging at side. Relax.

2. Grip the arm firmly but lightly. Too tight a grip will cause tremors of the hand and arm. Forget the recoil.

3. The top of the front sight should be even with the top of the rear sight, with an equal amount of light on both sides of front sight. See illustration.

Proper Method
of Sighting

IMPORTANT

This ACE Automatic Pistol has been tested with various makes of High Speed and High Velocity cartridges. For best results, we recommend this type of ammunition for use in this pistol.
