

# Scale Model Firearms

by  
**Joseph D. Kramer**

The two upper Nortons are machined from titanium as are a set of interchangeable barrels. The lower left pistol is an experimental Mauser Combat Pistol-HSP "service version". It is based on the Norton DP-75. Fewer than 10 of these experimental pieces were made. Only two are known to exist.

*Norton DP-75's resting on lid of custom Macassar wood case.*
